European Journal of Operational Research 60 (1992) 365–366
North-Holland

Contents Volume 60

1 An integrated evaluation of facility location, capacity acquisition, and technology selection for designing global manufacturing strategies (Invited Review)
V. Verter and M.C. Dincer

19 The influence of direction setting tactics on success in organizational decision making
P.C. Nutt

31 Modeling competitive pricing and market share: Anatomy of a decision support system
P.E. Green and A.M. Krieger

45 Uncertainty, experience and the phase theorem
A. Pearson and J. Hauschildt

52 An approach for finding the most preferred alternative in the presence of multiple critera
M.M. Köksalan and O.V. Taner

61 Ranking methods based on valued preference relations: A characterization of the net flow method
D. Bouyssou

68 A transitivity approach to preference relational systems
J.A. Moreno

76 Minimax resource allocation problems: Optimization and parametric analysis
H. Luss

87 Trade-off analysis using parametric optimization techniques
H. Nakayama

99 Adjustment of importance weights in multiattribute value models by minimum discrimination information
E.S. Soofi and J.J. Retzer

109 A note on conflict resolution and truthtelling
P. Bogetoft

117 Implementation of the centroid method of Solymosi and Dombi
D.L. Olson and V.K. Dorai

Special Issue on Measuring Manufacturing Flexibility

131 Measuring manufacturing flexibility: An empirical investigation
J.R. Dixon

144 The measurement and use of operational flexibility in the loading of Flexible Manufacturing Systems
J.J. Bernardo and Z. Mohamed

156 Models for the evaluation of routing and machine flexibility
P. Chandra and M.M. Tombak

166 The measurement of manufacturing flexibility
Y.P. Gupta and T.M. Somers

183 Stochastic analysis of flexible process choices
D. Sinha and J.C. Wei

200 A bicriterion framework for operations assignment and routing flexibility analysis in Cellular Manufacturing Systems
N. Singh, Y.P. Aneja and S.P. Rana

211 Flexibility and the choice of manufacturing facilities under short product life cycles
C. Gaimon and V. Singhal

224 Parts routing in a Flexible Manufacturing System with time-varying demands
M. Chen and A. Sule Alfa

233 Workforce staffing and scheduling: Hospital nursing specific models (Invited Review)
S.P. Siferd and W.C. Benton

247 A review of stochastic modelling of delay and capacity at unsignalized priority intersections
T.C.E. Cheng and S. Allam

260 A survey of algorithms for the generalized assignment problem
D.G. Cattrysse and L.N. Van Wassenhove

273 Approximation algorithms for three-dimensional assignment problems with triangle inequalities
Y. Crama and F.C.R. Spieksma

280 A computer graphic-based Decision Support System for multiple objective linear programming
P. Korhonen, J. Wallenius and S. Zionts

0377-2217/92/$05.00 © 1992 – Elsevier Science Publishers B.V. All rights reserved

287 Projection algorithms for linear programming
U. Betke and P. Gritzmann
296 A barrier method for dynamic Leontief-type linear programs
E.K. Yang and W.-S. Hwang
306 Generalized bilinear programming: Part I. Models, applications and linear programming relaxation
F.A. Al-Khayyal
315 Weakly redundant constraints and their impact on postoptimal analyses in LP
T. Gal
327 Simulated annealing applied to the process allocation problem
S. Sofianopoulou
335 On tightening cover induced inequalities
B.L. Dietrich and L.F. Escudero
344 Routing flexibility and production scheduling in a flexible manufacturing system
S. Ghosh and C. Gaimon
365 Contents Volume 60
